

Policy for use of services

We remind users that, according to the laws in force, domains (including any restricted area) must not include pages with material or extract thereof which:

- offends public order and morals,
- disturbs public or private peace,
- causes offence to others or harms anyone directly or indirectly,
- violates or infringes directly or indirectly the Italian laws in force;

In more serious cases such pages will be directly reported to the competent Authorities.

In particular, by way of example only, the following are not accepted:

- pages with material relating to paedophilia (sexual feelings or acts directed toward children);
- web pages which contain pornographic material or extract thereof, that is sexually explicit material represented through any means of expression (text, images, scanning, videos, animated gif, etc.); such material can only be published in specific restricted areas created by the website owner and available only to adults through the use of a password provided by the owner of the website once the age of the applicant has been verified: limitations of liability such as "by entering this website you confirm you are of legal age", "access to this website is restricted to persons over the age of 18" or similar warnings are considered inadequate control measures as such disclaimers have no legal value.
- pages with racist or offensive content, such as praises and/or celebrations of all those inclinations which favour or produce social discriminations or which consider race as a decisive factor in the progress of society and therefore forbid relationships with other races, considered an inferior race, through discrimination or in extreme cases violence, persecution and extermination. Moreover it is forbidden to include pages with religious, political or philosophical provocations etc. which cause intolerance, sectarianism and extremism;
- pages which contain viruses or harmful components, pirate software, cracks, keygenerators, serials, applications with the purpose of damaging the integrity of resources or that contribute to actions aimed at violating or attempting to violate the confidentiality of private messages (virus and the like will be deleted directly by the servers);
- pages containing material or extract thereof protected by trade-mark, patent, copyright (for example: music or multimedia files, protected by copyright, etc. Entering mp3 files will only be permitted if the user is the legal owner of the piece of music/song as author or publisher) or other legal or customary right of third parties, except with the express written consent of the owner of such right and in any case quoting its source.

Furthermore the users are obliged to accept and follow the conditions of use for network resources set out in the 'Netiquette' document and published on the website of the Italian Naming Authority.
